## 1. Overview

**Hama** is a distributed computing framework based on BSP (Bulk Synchronous Parallel) computing techniques for massive scientific computations, Currently being incubated as one of the incubator project by the Apache Software Foundation.

## 2. Getting Started

Start by installing Hama on a Hadoop cluster.

- [Learn about](#) Hama by reading the documentation.
- [Download](#) Hama from the release page.

## 3. Getting Involved

Hama is an open source volunteer project under the Apache Software Foundation. We encourage you to learn about the project and contribute your expertise. Here are some starter links:

- See our [How to Contribute to Hama](#) page
- [Jira usage guidelines](#)

## 4. Recent News

### 4.1. June 2, 2011: release 0.2.0 available

- BSP computing framework and its examples
  - Pi Estimator and Serialize Printing
- CLI-based managing and monitoring tool of BSP job

### 4.2. Apr 30, 2010: Introduced BSP Worldwide

We're introduced in the [BSP Worldwide](#).

### 4.3. May 20, 2008: Accept Hama to be a Apache incubator project

The Incubator PMC have voted to accept Hama to be a Apache incubator project.
